

Production Access Questionnaire

Testers Community

The objective of this report is to provide comprehensive answers that our clients can use to fill the production access form. You can use the answers directly or can make changes based on how you improved the app. After 14 days of testing, users will be prompted to fill a form on closed testing to get access to production. This document can be helpful in answering those questions.

App Name: Sound'St Boost - Volume++

App URL: <https://play.google.com/store/apps/details?id=com.soundboost>

Production Access Questionnaire

1) How did you recruit users for your closed test? For example, did you ask friends and family, or use a paid testing provider?

We used a paid testing provider to gather comprehensive feedback on the app's performance and features. Additionally, we reached out to some of our target users, audio enthusiasts and tech-savvy individuals, to gain real-world insights from the intended audience.

2) How easy was it to recruit testers for your app?

Answer: Easy

(You can select your own answer).

3) Describe the engagement you received from testers during your closed test

Testers actively engaged by providing valuable insights on usability, feature optimization, and overall satisfaction. Their feedback led to essential

improvements, such as enhancing the user interface and adding requested features, ensuring a more polished and enjoyable user experience.

4) Provide a summary of the feedback that you received from testers. Include how you collected the feedback.

Testers highlighted the need for improved ASO, a dynamic walkthrough for new users, a system theme option, a "Rate Your App" button, and optimized Play Store screenshots. Feedback was collected through surveys, direct communication, and usability testing sessions.

5) Who is the intended audience for your app?

Sound'ST Boost is designed for audio enthusiasts and casual users seeking to enhance their listening experience. It caters to individuals who enjoy music, movies, gaming, and podcasts, providing powerful audio enhancements and an intuitive interface for all users.

6) Describe how your app provides value to the users.

Sound'ST Boost delivers exceptional audio enhancement with features like volume boosting, a 10-band equalizer, and immersive surround sound. Users can enjoy crystal-clear sound for music, movies, and gaming, all while

benefiting from a user-friendly, completely free application without ads or tracking.

7) How many installs do you expect your app to have in your first year?

Answer: 10k - 100k

(You can select your own answer).

8) What changes did you make to your app based on what you learned during your closed test?

Based on user feedback, we optimized the app description for ASO, added a dynamic walkthrough for new users, implemented a system theme option, included a "Rate Your App" button, and improved Play Store screenshots to better showcase the app's features, enhancing overall appeal.

9) How did you decide that your app is ready for production?

After rigorous testing and incorporating essential feedback from testers, we ensured the app is stable, user-friendly, and fully optimized. The enhancements made based on user insights position Sound'ST Boost as a high-quality audio enhancement tool ready for successful production release.

10) What did you do differently this time?

This time, we prioritized user engagement by collecting diverse feedback through targeted testing. We focused on optimizing the app's visibility and usability based on tester suggestions, resulting in a refined product that meets user expectations and is ready for production.

You can use the above answers or add your personal touch to those answers to make them more natural and meaningful. Don't forget that this form plays the most important role in the entire process of getting production access. If you have any more questions, please feel free to contact us.

**Best regards,
Testers Community Team**
